

Bumibiopower Biomass Power Plant Project (Malaysia)

CDM project for the generation of electricity utilizing biomass as fuel in Pantai Remis, Perak, Malaysia

The purpose of the Project Activity is to generate electricity utilizing empty fruit branches (EFBs) as fuel, and to develop an enhanced approach to waste-disposal in the palm oil industry. The project company Bumibiopower (Pantai Remis) Sdn Bhd will construct a power plant with 11.5 MW gross generating capacity.

EEC provided the following consulting services: Introduction of the project to the Austrian JI/CDM Programme for the purchase of CERs, preparation of the application file, assistance of Bumibiopower (Pantai Remis) Sdn Bhd during negotiations of an Emission Reduction Purchase Agreement with representatives of the Austrian JI/CDM Programme. As a result of EEC's services Bumibiopower (Pantai Remis) Sdn Bhd and the Republic of Austria signed an Emission Reduction Purchase Agreement.
