

REP Ventures Sdn Bhd Biomass Power Plant Projects (Malaysia)

Development of 4 CDM Projects for the Generation of Electricity Utilizing Biomass as Fuel in Kedah, Malaysia

The purpose of the project activity is to generate electricity utilizing rice husk and straw as fuel. Within this project activity four power plants (Kodiang Bio Energy Sdn. Bhd. Power Plant, RE Venture Holdings Sdn. Bhd. Power Plant, Pendang Bio Energy Sdn. Bhd. Power Plant, Gurun Bio Energy Sdn. Bhd. Power Plant) each with 11,5 MW gross generating capacity shall be realised as CDM Projects. EEC (in co-operation with Camco International Ltd,) provides the following consulting services:

- Evaluation and optimization of possible carbon assets
- Preparation of the PIN and the PDD (Project Design Document)
- Management of the validation process
- Marketing of the CERs generated by the projects to potential purchasers
- Management of the Host Country Approval
- Implementation of the Monitoring Plan (MP)
- Management of verification process
